PROGRAM GRANT AWARD ANNOUNCEMENT
SENATOR TRACY PENNYCUICK

Senator Tracy Pennycuick is pleased to announce that Boyertown Borough will receive \$60,000 to purchase and install an emergency generator for the Trout Run Dam Pump Station located in Earl Township. The Trout Run Dam is the primary water supply for the Boyertown Borough water system which serves a population of approximately 8,000 people. When there is a loss of power at the pump station, the plant operator is required to switch to the Popodickon Dam for the supply of water. The Popodickon Dam is a considerably smaller body of water. The installation of the emergency generator will allow for continued, uninterrupted use of the pump station during temporary power outages due to storms or other natural disasters. “As a state Senator, ensuring the safety and reliability of our infrastructure in our towns and boroughs is a top priority. I’m pleased to assist our municipalities with funding for these important projects to better ensure the well-being of our citizens,” said Senator Pennycuick.
