Boyertown Borough Council Boyertown Pool Update

On Monday, November 6, 2023, at a meeting of Borough Council a motion was approved to affirm the Borough Manager's execution of the proposal provided by Aquatic Facility Design, Inc. to conduct a survey and assessment of the pool to examine the options for repair and assign costs to those options. Aquatic Facility Design anticipates completion of the report and submission to the Borough in December.

Boyer Swimming Pools, Inc. completed miscellaneous repairs to the expansion joints and pool shell and plugged the main drain. Winterization of the pool and splashpad has been completed and the pool has been filled with water to a winter level.

As previously noted, this action was taken to prevent further deterioration of the structure over the winter months while the Borough continues investigation of pool repair costs. At a minimum those repairs include full restoration of all three joints, shell and skimmer box repairs, and replacement of the failed main drain line which runs from the diving well to the pump house and is approximately fourteen feet deep.

It should be noted that Borough Council has not made a decision to reopen or to permanently close the community pool.
